How Can I install Mobile API add-on?

Requirements

* Apache with `mod_rewrite`

* Enable curl in php.ini

* Change the 'post_max_size' and `upload_max_filesize` to 200Mb in php.ini

* PHP 5.4 or higher and less than PHP 7

* MySQL 4.1 or higher

* If STRICT mode is On, turn it Off.

Installation

Below prerequisites need to be taken care of prior to installation.

The most important thing is if you have already purchased any add-on before 16th July 2016, then contact us at "**support@orangescrum.org**" before you proceed to the following.

Note: If you have already installed the **Addoninstaller** before then no need to install it again. Only exception is if you are finding any new version of installer or you have not installed before then follow the below steps for successful and seamless installation.

- Make sure to keep a backup of your existing "app" folder of your current working directory.
- Extract the zip file(AddonInstaller-V1.0.zip) to your desktop.
- Remove the existing "app" folder from your working directory then copy and paste the extracted "app" folder inside "AddonInstaller-V1.0" to your working directory.

- If you are using local machine as storage (excluding Amazon S3), please replace the folder, named "files" inside the "app/webroot" folder from the back up to the current "app/webroot" folder.
- Give write permission to "app/Config", "app/tmp", "app/Plugin" and "app/webroot" folders.

For Example:-chmod -R 777 app/Config

chmod -R 777 app/tmp

chmod -R 777 app/Plugin

chmod -R 777 app/webroot

- Import the "**installer.sql**" files from the extracted files to your current database. If you have already imported installer.sql before then no need to import it again. Only exception is if you are finding any new version of installer.sql then import to your current database.
- Do necessary changes to "constants.php" and "database.php" inside "app/Config" folder again as you have done earlier. For Example SMTP email credentials in constants.php and database credentials in database.php.
- Run your website once.

Ex. http://localhost/orangescrum (if you are using localhost)

http://127.0.0.1/orangescrum (if you are using IP)

http://myprojects.orangescrum.com (if you are using any valid domain)

Note: if you are facing any issue or seeing any blank page after doing all the above steps, then just do the following once.

• Replace "Configure::write('debug',0);" with "Configure::write('debug',2);" in the app/Config/core.php. Run the web url once and restore the debug value to 0 again.

i.eConfigure::write('debug',0);

Congratulations!!

Add-on Installation:-

- Download the Add-on zip file.
- Place the downloaded zip file(Ex. Timelog-V1.0.zip) in the "app/webroot" folder.
- Log in to the application.
- To install the add-on(Ex. Time log add-on) run below link once and follow the instructions.

Ex. http://..../install/timelog (for Time Log add-on)

Note: http://.... means your Orangescrum access URL.

Ex. http://localhost/orangescrum (if you are using localhost)

http://127.0.0.1/orangescrum (if you are using IP)

http://myprojects.orangescrum.com (if you are using any valid

domain)

• Do the same for other add-ons.

Ex. http://..../install/invoice (for Invoice add-on)

http://..../install/taskstatusgroup (for Task Status Group add-

on)

http://..../install/ganttchart (for GanttChart add-on)

http://..../install/recurringtask (for Recurring Task add-on)

http://..../install/api (for API add-on)

http://..../install/chat (for Chat add-on)

http://..../install/clientmanagement (for Client Management

add-on)

http://..../install/projecttemplate (for Project Template add-

on)

Note: you can find notification.js, node-js-installation-linux.pdf, node-js-installation-windows.pdf file in app/plugin folder after install the chat plug-in.

For Upgrading AddonInstaller:-

- Download the AddonInstaller zip file.
- Before installing updated AddonInstaller, make sure to keep a backup of your existing "app/Plugin" and "app/webroot/files" folders.
- Then follow the steps written above to install AddonInstaller.
- After installing the new AddonInstaller, Copy all the folders inside "app/plugin" backup folder to the new "app/Plugin" folder.
- Also copy all the folders inside "app/webroot/files" backup folder to the new "app/webroot/files" folder.

How can I use Mobile API to get access my app?

Mobile API will help you to generate the API access token to use the mobile app. To generate the access token:

- Go the Company Settings under Setting
- Click on **My Company**
- Navigate to API Access Token & Click on Generate
- Click on **Update**

What is my Login id & password for Mobile app?

The email id & password is same as you used for your Orangescrum account. If you're using Sign in with Google account, then do same here in mobile app.

What are features present in Mobile app?

The Mobile App lets you:

- View the project listing of all your assigned projects
- Task listing of each project
- Create & assign tasks on the go
- Post comments and updates to tasks
- Edit, delete & change the status of tasks
- Search Project & Tasks
- Check task updates, indulge in discussions, and adjust schedules, spot tasks on the go

What is the Play store link for Android app?

You can install the Orangescrum Mobile App for Android by searching Orangescrum from Play store Or here is the link for Orangescrum: <u>https://play.google.com/store/apps/details?id=com.andolasoft.orangescrum&hl=</u> <u>en</u>

What is the App store link for the iOS app?

You can install the Orangescrum Mobile App for iPhone/iPad by searching Orangescrum from App store or here is the link for Orangescrum: <u>https://itunes.apple.com/ph/app/id1132539893</u>

Can I use this app for cloud (SaaS) edition?

Yes, but not at the moment. Once we release the app, you can see the option to use it for community or cloud edition. You need to select which edition you want to use.

How many users can use this mobile app?

There is no limit to use the mobile app for community users. However for SaaS (cloud) users, the limit depends on the pricing plan.

Can I get regular updates for mobile app with the same price?

Yes, you will get regular updates. Check Play Store or App Store for the update. Also you can subscribe to our <u>blog</u> to get regular updates about Orangescrum new features, add-on updates. You can check the <u>roadmap</u> or Mobile API add-on <u>Release Note</u> of the add-on too.

Can I use both Android & iOS app with Mobile API?

Yes, you can. And the access key or code will be same for both iOS & Android.

How can I install my Mobile API add-on?

Please download the Zip file after purchasing the add-on. Extract the file, you can see the README.md file. If you face any issue, feel free to reach us at <u>Support@orangescrum.com</u>.
